Leadership and innovation skills for small and medium-sized businesses

.....
A seven month programme starting November 2015

In partnership with

IME focuses on three interlinked themes to help you and your business... Innovation, Technology and Leadership.

Who is IME for?

Small and medium-sized businesses based in the North West, who have significant engineering and/or manufacturing capability, who want to develop leadership and innovation skills, through working with large organisations and a leading university.

Cost?

This programme has received significant co-investment from UKCES and industry, subsidised cost per delegate is £1,500.

Develop a network of like-minded innovative SMEs

Gain key insights from organisations – BAE Systems and Siemens

Access new technology via Lancaster University Engineering Department and the Catapult Centres

Develop leadership and management skills at Lancaster University Management School

What's Involved?

- ▶ BAE Systems, Siemens and the High Value Manufacturing Catapult sharing best practice and technology insights from their organisations
- ▶ Workshops on **'state of the art'** equipment from Lancaster University's Engineering Department
- ▶ Innovation, leadership and management workshops delivered by Lancaster University Management School
- ▶ Visits to **"best in class"** organisations around the region
